WINTER 2023

BLOOMINGTON

Building a Relationship

When the house passed from the parents to their daughter, the relationship with Plekkenpol Builders continued.

The West Bloomington house with its large wooded yard had been a beloved family home for years. When the owners were ready to sell it and move on in 2020, they were thrilled when their daughter and her husband chose to purchase the house and keep it in the family.

The parents had used Plekkenpol Builders for a kitchen remodel in 1991, and a few years after that, to repair damage from a kitchen fire. When their daughter and her husband wanted to update their new home, they followed in her parents' footsteps and once again contacted Plekkenpol Builders.

BEFORE
The kitchen, last remodeled in the early 90s, featured an angled island and support columns.

Building a Relationship

Open Floor Plan

The goal was to create a more modern open kitchen and dining room with custom storage, updated appliances, plenty of counter space and a large center island, big enough for a family of seven. The natural wood of the island contrasts nicely with white cabinets and glossy backsplash tile, white quartz countertops and dark wood and black accents.

The kitchen and dining room create a great room that is ideal for large family meals and gatherings with friends.

Rustic Modern Style

The new owners originally wanted to remove the existing support columns and beams; when that became cost-prohibitive, they chose to emphasize them instead by wrapping them in dark stained oak for a rustic modern look.

Dated oak cabinets in the dining room were replaced with a floor-to-ceiling wet bar/beverage station with a glossy tile backsplash, floating shelves and a wine refrigerator. The doorway to the left of the wet bar leads to the powder room and updated mud room (below).

A wall of cluttered cabinets stretched across the dining room.

The new wet bar/beverage station organizes the space and is perfect for entertaining.

Butler's Pantry

The kitchen redesign involved relocating the laundry room to create space for a new butler's pantry that can be accessed from the kitchen (left). The pantry features an arched doorway, additional custom storage, prep space and even a chalkboard "menu."

The owner's mother visits often and loves the changes to her former home. Though the space has been remodeled, the warm feel is the same – and ready to pass on to the next generation.

NARI-MN Contractor of the Year Award Plekkenpol Builders Wins GOLD Design Award

Plekkenpol Builders was honored with a **Contractor of the Year (CotY) Award** by the National Association of the Remodeling Industry at its annual awards celebration on November 10, 2022.

We received **Gold** for our warm and rustic kitchen remodel in Edina. Poor space planning in a smaller home had resulted in a dark, closed off kitchen, inadequate storage and a lack of counter and prep space. Our clients envisioned a more open main level, custom amenities and interesting, unexpected finishes.

“From concept to completion, you exceeded our every expectation,” said the homeowners. “This was truly a joy to see come together, and we could not be happier with the outcome.”

The CotY Awards are the premier awards for the remodeling industry. Judging is based on problem solving, functionality, aesthetics, craftsmanship and degree of difficulty. We are thrilled to have received this award!
